This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

A word may be added here upon a particular problem, in the solution of which these tables are available: that, namely, of the length of the Katun. Although I have above used only the term "360-day period," it is but in recognition of the still-existing difference of opinion among writers, and because the name is not there material. It is manifest that Mayan dates had double designations, one conforming to the ordinary month, year and 52-year computation (a designation of course of limited definiteness in chronological use) and another, which involved as units of computation the numbers 20, 360, 7,200, 144,000, etc. Up to a certain point in the investigations it is immaterial whether we say 14,040 days or 1 katun, 19 ahaus. That for chronological purposes these units were used accords with all results up to date. They also might or might not be synchronized, as for popular use, (with no gain thereby in definition of the actual date) with the other system. I will only say that my reading to date has shown me no single fact inconsistent with calling 360 days an Ahau, and many points against it.

If the high periods of the codex are numbers only, the Mayas must have employed both systems of numeration, through position-value and symbol-value. But the use of the Arabic or position-value method is so foreign to what we know of Mayan writing that it should only be assumed upon positive and direct evidence, where no other conclusion is possible, and a concurrent use of both systems is yet more unlikely. Such a break, further, in a vigesimal progression, as the substitution of 360 in the third place, is highly improbable, and its coordinate use with the normal 400, for which we have direct testimony, incredible. It is not a necessity of the passages from which it was inferred, for these are all time counts, and the existence of a 360-day time unit, as is the "old year" sometimes mentioned, explains them even better.

The explanation of the Ahau as dating from the second day of Cauac years is, to me, unique, insufficient and supported by no direct evidence whatever. The now acknowledged use of the different sets of year-bearers in different districts, there being in the probably older centres of civilization, as in the Dresden codex, no such thing as a Cauac year, increases the difficulty of explaining the Ahau in any relation to the 365-day year. Its interpretation as the last day of a 360-day period, Ymix being the first, accords with the established chronological importance of the day Ymix.

The hypothesis of a 24-year (24x365) katun is likewise, to my knowledge, unsupported by any conclusive evidence, is opposed by direct 20-ahau testimony, and its fitness to the katun series of numbers shared in by the 20x360 term.
